

Nassarius

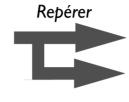

Sélectionner une date

march 2010 : Nas 01 sept 2010 : Nas_02 march 2011 : Nas_03

Structure démographique instantanée

ggplot(...) + geom_histogram(breaks = limites)

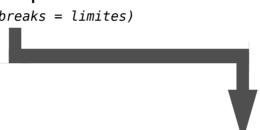

Nombre de cohortes

Position des pics

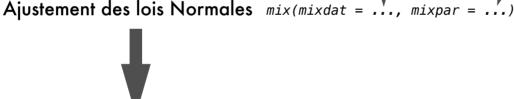

Premier objet

mixgroup(x = ..., breaks = limites)

Deuxième objet

mixparam(mu = ..., sigma = ...)

Extraction des valeurs importantes

(taille et abondance)

```
cohort <- tribble(</pre>
~date,
                ~size,
                         ~abundance,
"2010-03-01",
"2010-09-01",
```

Calcul des masses

Relation allométrique

```
cohort_2 <- cohort %>%
mutate(mass = ...)
```
